

Carefree Caroline Rose
Rosa 'Ivta hockey'

Height: 3 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 5a

Group/Class: Shrub Rose

Description:

Attractive double blooms of coral-orange, throughout summer; dark green, robust and disease resistant foliage; well suited for containers, a garden accent, or a low flowering hedge

Ornamental Features

Carefree Caroline Rose features showy coral-pink flowers with orange overtones and gold eyes at the ends of the branches from early summer to early fall. The flowers are excellent for cutting. It has dark green foliage throughout the season. The glossy oval compound leaves do not develop any appreciable fall colour. The fruit is not ornamentally significant.

Landscape Attributes

Carefree Caroline Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Carefree Caroline Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Carefree Caroline Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
